

Sprint 3 Plan

Product Name: Train Easy

Team Name: Routeam

Sprint Completion Date: 7/21/24

Goal

Implement the user profile screen, store milestones/records, finalize UI, deploy v1.0

Task Lists

1. As someone maintaining/developing the habit of going to the gym, I would like a profile so that I can view my stats and get a general idea of my progress. [8]
 - a. Creating a clickable profile section from anywhere on app
 - b. Develop a profile page with name, height, and weight.
 - c. Maybe a screen when a user opens app for the first time, gathers personal info
2. As someone maintaining/developing the habit of going to the gym, I would like to see my milestones and records on my profile. [8]
 - a. Implement the personal record section on the profile page.
 - b. Display highest weights and reps under pr section
 - c. Central place to see all workouts
3. As someone maintaining/developing the habit of going to the gym, I want to use an app with no/limited bugs. [6]
 - a. Refine any bugs.
4. As someone maintaining/developing the habit of going to the gym, I want to see when I achieve a personal record to boost my morale and motivation. [8]
 - a. Indicate when a cardio PR is inputted. Resistance already implemented.
